Cost and Management Accounting-'I' is designed in accordance with the latest CBCS syllabus as prescribed by the University of Calcutta and other major universities of Eastern India. It is primarily intended for Semester II of B.Com curriculum, besides being equally useful for the students of

professional courses. The book presents the core concepts of accounting in a lucid and easy-to-understand language. It provides a right blend of theory and application to lay a solid foundation for the advanced aspects of Cost and Management Accounting, not only for higher studies but also for corporate requirements. Emphasis on the explanation of Cost Accounting Standards and guidelines with comprehensive examples. Special focus on topics related to Employee Cost and Incentive Systems (Labour Costs), Accounting for Materials and Accounting for Overheads. Chapter-wise segregation of questions from last 10 years' (2008-17) question papers of the University of Calcutta—for general and honours courses.

Expanding Biofuel Production and the Transition to Advanced Biofuels Cambridge University Press
 The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group II volume provides a completely up-to-date scientific assessment of the impacts of climate change, the vulnerability of natural and human environments, and the potential for response through adaptation. Written by the world's leading experts, the IPCC volumes will again prove to be invaluable for researchers, students, and policymakers, and will form the standard reference works for policy decisions for government and industry worldwide.

Uncertainty in Greenhouse Gas Inventories - Verification, Compliance, and Trading

Taxmann Publications Private Limited

While energy prices, energy security, and climate change are front and center in the national media, these issues are often framed to the exclusion of the broader issue of sustainability--ensuring that the production and use of biofuels do not compromise the needs of future generations by recognizing the need to protect life-support systems, promote economic growth, and improve societal welfare. Thus, it is important to understand the effects of biofuel production and use on water quality and quantity, soils, wildlife habitat and biodiversity, greenhouse gas emissions, air quality, public health, and the economic viability of rural communities.

Taxmann's PROBLEMS & SOLUTIONS for Financial Reporting - Questions from Past Exams, Educational Materials, Ind AS Bulletins, RTPs/MTPs of ICAI, Companies (Ind AS) Amendment Rules, etc. | CA Final S. Chand Publishing

Water-energy Interactions in Water Reuse McGraw-Hill Education

Transforming our energy supplies to be more sustainable is seen by many to be the biggest challenge of our times. In this comprehensive textbook, L. D. Danny Harvey sets out in unprecedented detail the path we must take to minimize the effects that the way we harness energy will have on future climate change. The book opens by highlighting the importance of moving to low carbon technologies for generation, then moves on to explain the functioning, potential and social/environmental issues around: solar energy wind energy biomass energy geothermal energy hydroelectric power ocean energy nuclear energy. It also covers the options for carbon capture and storage and the contexts in which low carbon energy can best be utilized (potential for community integrated systems, and the hydrogen economy). The book closes with scenarios that combine the findings from its companion volume (concerning the potential for limiting future energy demand) with the findings from this volume (concerning the cost and potential of C-free energy systems) to generate scenarios that succeed in limiting future atmospheric CO₂ concentration to no more than 450 ppmv. Detailed yet accessible, meticulously researched and reviewed, this work constitutes an indispensable textbook and reference for students and practitioners in sustainable energy and engineering. Online material includes: Excel-based computational exercises, teaching slides for each chapter and links to free software tools.

Cost and Management Accounting-I Routledge

A Taste of Grace is an easy-to-read page-turning exploration of God's amazing grace, demonstrated and illustrated by the teachings of Jesus. A Taste of Grace proclaims God's grace as irreconcilably opposed to the core values and beliefs of institutionalized religion and reveals God's grace to be an absurd and foolish sentiment that doesn't add up to the human mind.

CA Inter Financial Management McGraw-Hill Education

Foreword by CA. (Dr.) Girish Ahuja Also very useful for B.Com and other undergraduate courses
 Pages : 569 Contents : Companies Act 2013, Contract Act 1872, Negotiable instruments Act 1881, General Clauses Act 1897, Interpretation of Statutes The main features of this book which make it better than other books, are :- 1.All the topics have been presented in a tabular form (no paragraphs

have been used) which make it easier to read and understand. 2. Diagrams for most of the topics have been given in this book. This makes it very easy for the students to understand and remember the contents. 3. All the concepts have been given pointwise which makes reading very fast and easy. 4. This book gives conceptual clarity of the law. 5. This book not only helps in scoring very good marks in exam, but also in using the law in practical world.

Christianity Without the Religion CA M K JAIN

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences

for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

The Challenge of Transition Cambridge University Press

This book is designed for quick reference in Information Technology and strategic management. It perfectly fits for the curriculum for IPCC paper 7. Explained in very easy language and readability is fantastic.
