Annual Catalogue of Australian Publications Asian Development Bank Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and

quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries--Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

Starting in the 1850s achievement tests became standardized

in the British Isles, and were administered on an industrial scale. By the end of the century more than two million people had written mass exams, particularly in science, technology, and mathematics. Some candidates responded to this standardization by cramming or cheating; others embraced the hope that such tests rewarded not only knowledge but also merit. Written with humour, Making a Grade looks at how standardized testing practices quietly appeared, and then spread worldwide. This book situates mass exams, marks, and credentials in an emerging paper-based meritocracy, arguing that such exams often first appeared as

"cameras" to neutrally record achievement, and then became "engines" to change education as people tailored their behaviour to fit these tests.

Taking the perspectives of both examiners and examinees, Making a Grade claims that our own culture's desire for accountability through objective testing has a long history.

The history of

scholarship has

undergone a complete

renewal in recent

years, and is now a

major branch of

research with vast

territories to explore; a

substantial introduction to History of Scholarship surveys the past vicissitudes of the history of scholarship and its current expansion. The authors, all specialists of international standing, come from a variety of backgrounds: classical studies, history of religions, philosophy, early modern intellectual and religious history. Their papers illustrate a variety of themes and approaches, including Renaissance antiquarianism and philology; the rise of the notion of criticism; Biblical and patristic scholarship, and its implications for both confessional orthodoxy and eighteenth-century free thought; the history of philosophy; and German

historiographical thought in both the eighteenth and the nineteenth centuries. This challenging volume constitutes a collection of remarkable quality, helping to establish the history of scholarship as a more broadly acknowledged, worthwhile field of study in its own right.

An illuminating guide to publishing a scholarly journal written by a former editor-in-chief

American Anthropologist is the flagship journal of the American Anthropological Association, published quarterly, reaching more than 12,000

readers with each issue and representing four distinct subfields. The journal publishes articles that add to, integrate, synthesize, and interpret anthropological knowledge; commentaries and essays on issues of importance to the discipline; and reviews of books, films, sound recordings, and exhibits. From 2012 to 2016, Michael Chibnik was editor-in-chief of American Anthropologist. In *Scholarship, Money, and Prose*, he writes a candid account of the complex and challenging work entailed in its production. Providing detailed ethnographic and historical descriptions of the operations of a major journal and behind-the-

scenes anecdotes of his experiences, Chibnik makes transparent the work of an editor-in-chief. He reveals how he assembled diverse materials, assessed contradictory peer reviews of manuscripts submitted for publication, and collaborated with authors to improve the legibility and clarity of their articles. He also examines controversies that emerged from his columns on open access and biological anthropology and the inclusion of politically charged material in the journal. Scholarship, Money, and Prose sheds light on two aspects of successful editing that are common to academic journals whatever their subject matter. The

first task is to strike a balance among different theoretical perspectives and topical specialties. This pressure is particularly salient in a field like anthropology in which scholars differ greatly in the extent to which they adopt a scientific or humanistic perspective. Second, editors must attend carefully to the need to keep costs down and revenues up in an economic environment in which libraries are cutting subscriptions and publishers are considering the future sustainability of journals. Relevant to a wide range of disciplines, Scholarship, Money, and Prose serves as a window onto the past, present, and future of scholarly publishing. An Evaluation of Its
